

Based on your updated instructions, here are the three specific strategies (Bullish Vertical, Bearish Vertical, and Neutral Iron Condor) using the data for **NIFTY at 26,000** with a lot size of **75**.

1. Bullish View: Bull Call Vertical Spread

This strategy is used if you expect the NIFTY to rise above 26,000. It involves buying an At-the-Money (ATM) call and selling an Out-of-the-Money (OTM) call to reduce the cost.

- **Option Legs:**
 - **Buy** 1 Lot 26,000 CE @ ₹129.50 (Ask)
 - **Sell** 1 Lot 26,100 CE @ ₹76.25 (Bid)
 - **Calculations:**
 - **Net Premium Paid:** $\$129.50 - 76.25 = 53.25\$$ points
 - **Total Cost (Outflow):** $\$53.25 \times 75 = \text{₹}3,993.75\$$
 - **Max Profit:** $\$(100 - 53.25) \times 75 = \text{₹}3,506.25\$$ (If NIFTY $\geq \$ 26,100$)
 - **Max Loss:** Net Premium Paid = **₹3,993.75** (If NIFTY $\leq \$ 26,000$)
 - **Break-even Point:** $\$26,000 + 53.25 = \text{₹}26,053.25\$$
 - **Margin Required:** ₹50,000
-

2. Bearish View: Bear Put Vertical Spread

This strategy is used if you expect the NIFTY to fall below 26,000. It involves buying an ATM put and selling an OTM put.

- **Option Legs:**
 - **Buy** 1 Lot 26,000 PE @ ₹102.55 (Ask)
 - **Sell** 1 Lot 25,900 PE @ ₹59.50 (Bid)
 - **Calculations:**
 - **Net Premium Paid:** $\$102.55 - 59.50 = 43.05\$$ points
 - **Total Cost (Outflow):** $\$43.05 \times 75 = \text{₹}3,228.75\$$
 - **Max Profit:** $\$(100 - 43.05) \times 75 = \text{₹}4,271.25\$$ (If NIFTY $\leq \$ 25,900$)
 - **Max Loss:** Net Premium Paid = **₹3,228.75** (If NIFTY $\geq \$ 26,000$)
 - **Break-even Point:** $\$26,000 - 43.05 = \text{₹}25,956.95\$$
 - **Margin Required:** ₹50,000
-

3. Neutral View: Iron Condor

This is a range-bound strategy. We sell a Call and a Put spread to collect premium, betting that NIFTY will stay between 25,900 and 26,100.

- **Option Legs:**
 - **Sell** 1 Lot 26,100 CE @ ₹76.25 (Bid)
 - **Buy** 1 Lot 26,200 CE @ ₹48.05 (Ask)
 - **Sell** 1 Lot 25,900 PE @ ₹59.50 (Bid)
 - **Buy** 1 Lot 25,800 PE @ ₹35.30 (Ask)
- **Calculations:**
 - **Credit from Call Side:** $\$76.25 - 48.05 = 28.20\$$
 - **Credit from Put Side:** $\$59.50 - 35.30 = 24.20\$$
 - **Net Premium Received:** $\$28.20 + 24.20 = 52.40\$$ points
 - **Total Credit (Inflow):** $\$52.40 \times 75 = \text{₹}3,930\$$
 - **Max Profit:** Net Premium Received = **₹3,930** (If NIFTY is between 25,900 and 26,100)
 - **Max Loss:** $\$(\text{Spread Width} - \text{Net Premium}) \times 75 = (100 - 52.40) \times 75 = \text{₹}3,570\$$
 - **Upper Break-even:** $\$26,100 + 52.40 = \text{₹}26,152.40\$$
 - **Lower Break-even:** $\$25,900 - 52.40 = \text{₹}25,847.60\$$
- **Margin Required:** ₹70,000

Strategy Summary (1 Lot Each)

Strategy	Market View	Net Premium	Max Profit	Max Loss	Break-even
Bull Call Spread	Bullish	-₹3,993.75	₹3,506.25	₹3,993.75	26,053.25
Bear Put Spread	Bearish	-₹3,228.75	₹4,271.25	₹3,228.75	25,956.95
Iron Condor	Neutral	+₹3,930.00	₹3,930.00	₹3,570.00	25,847 - 26,152
